The list

23

35 Innovators under 35

Our annual list of 35 rising young innovators is an opportunity to take a look not just at where technology is now but where it's going and who's taking it there.

+ Inventors	24
+ Humanitarians	30
+ Visionaries	34
+ Pioneers	38
+ Entrepreneurs	44

Features

48

The fight to reclaim AI

How a small group of researchers at the margins built a movement to wrest the world's most powerful emerging technology from Big Tech's control.

By *Karen Hao*

54

The great chip divide

A shortage of microchips is threatening to slow digital innovation inspired by the promise of ever faster, cheaper computing power.

By *Jeremy Hsu*

60

Those who fall behind get beaten up

Can science transcend nationalism?

By *Yangyang Cheng*

66

Fast time

A series of photographs taken around the world show how climate change is warping geological time.

Photos by *Ian van Coller*

Review

74

Books, culture, and policy in perspective

Sarah Jaffe on how to have a labor movement in the age of Big Tech.

James Surowiecki on the task facing modern-day trustbusters.

Gernot Wagner on what cheap solar power means for climate change.

Wudan Yan on the toll of online harassment.
