

THE TECHNONATIONALISM ISSUE

Introduction

10

The virus that split the world

Covid-19 has accelerated trends that will shape geopolitics in decades to come.

By

Steven Feldstein

Fiction

82

The first murder

By

Fatin Abbas

The back page

88

No, we can't all just get along

14

The coronavirus responders

Interviews with public health leaders in Mongolia, Germany, Liberia, Uruguay, Sweden, and Vietnam show how some countries have dealt with covid-19 far better than others. *By Krithika Varagur*

22

China: clean-tech superpower

The shift away from fossil fuels will lead to many jobs. Most of them will be in China.

By James Temple

24

How Germany tamed covid

The story of how Angela Merkel turned things around, both for herself and for her country.

By Kati Krause and Patrick Leger

28

Take your best shot

Everybody in the world wants a vaccine, but countries will naturally help themselves first.

By Antonio Regalado

31

Q+A: Larry Corey

A virologist explains how long it might take to find a covid-19 vaccine, and why it will be easier than finding one for HIV/AIDS.

By Antonio Regalado

34

One register to rule them all

Brazil was already on its way to becoming a surveillance state. Then covid-19 happened.

By Richard Kemeny

38

Yandex's balancing act

Inside the uneasy coexistence of a Russian tech giant and the Kremlin. *By Evan Gershkovich*

44

Blind spot

India, the world leader in internet shutdowns, is using them to stifle protest during the pandemic.

By Sonia Faleiro

50

China's data privacy paradox

As the surveillance state grows stronger, so do laws protecting consumers' personal data. Can both things keep happening?

By Karen Hao

56

Q+A: Samantha Hoffman

China doesn't only collect enormous amounts of data on its own citizens; it also sucks up data from around the world. Here's how.

By Mara Hvistendahl

58

Hacker, G-man, seed thief, spy

Chinese firms are trying to steal US agricultural secrets. The FBI is trying to stop them. Who's winning?

By Mara Hvistendahl

62

Pegasus unbound

The world's most notorious spyware company says it wants to clean up its act.

By Patrick Howell O'Neill

68

Unmade in America

Decades of decline left the US's industrial commons incapacitated in the face of the pandemic.

By Rowan Moore Gerety

76

5 for the bookshelf

These books investigate how government decisions affect science and technology in ways that aren't widely appreciated.

By Konstantin Kakaes

78

The cult of human simulation

The history of "people analytics" goes back farther than you think. A new book by Jill Lepore looks at one chapter in that history.

By Christine Rosen
