

# THE CITIES ISSUE

Edited by Konstantin Kakaes and Amy Nordrum

## Introduction

8

### Solving for the city

Technology can help fix many problems that cities face today.

So why hasn't it?

By Jennifer Clark

## Fiction

82

### Unpaired

By Tim Maughan

## The back page

88

### The city inside our heads

## Features

30

### Neighborhood watch

Police departments want to know as much as they legally can. But how much surveillance technology is too much?

By Rowan Moore Gerety

42

### Back to the streets

The pandemic upended public transit. Now city planners are trying to map out what's next.

By John Surico

48

### Rivers of dreams

How South Bend, Indiana, came to lead the way in smart sewer control.

By Andrew Zaleski

58

### Cities of people

"Unequal Scenes," a drone photography project, illuminates scars in the urban fabric.

By Johnny Miller

68

### Ancient cities are made of data

High-tech tools are helping us understand the past.

By Annalee Newitz

## Report

13

### Dispatches

A look into China's policy of building out massive city clusters, each of which will be home to as many as a hundred million people.

By Ling Xin

17

### A bridge dictionary

Subtle advances in construction techniques are making bridges bigger, safer, and longer-lived.

By Jon Allsop

18

### Game of thrones

Cities try some high-tech approaches to public restrooms.

By Andrew Giambrone

20

### Five arguments

Andrew Giambrone on the case for density. Julia Hotz on Seattle's election experiment. Fábio Duarte, Washington Fajardo, and Carlo Ratti on embracing unplanned settlements. Shoma Abhyankar on addressing India's slums. And Joseph Dana on Cape Town's fight for energy independence.

28

### The age of megacities

Curbing emissions in a few big cities could have an outsized impact on climate change.

By Gabrielle Merite

## Reviews

75

### "A humming, smoking, ever-changing contraption"

How three mid-20th-century visitors saw Los Angeles as a machine.

By Colin Marshall

78

### Uncanny alleys

Science fiction is reimagining cities in ways that feel both familiar and strange.

By Joanne McNeil
